DISTRICT OF OHIO, set.

BE IT REMEMBERED, That on the 10th day of February, in the year of our Lord one thousantd eight hundred and twenty-eight, and in the fifty-second year of the American idependence, Guy W. Wright, of said district, hath deposited in this office the title of a book, the right whereof he claims as proprietor, in the words and figures following, to wit.

"*The Western Medical and Physical Journal, Original and Eclectic.—Edited by Daniel Drake, M. D. late Professor of the Theory and Pratice of Medicine in Transylvania University, and Guy W. Wright, M. D. late Editor of the Ohio Medical Repository, &c.*"

In conformity to the act of the Congress of the United States, entitled "An act for the encouragement of Learning, by securing the copies of Maps, Charts and Books to authors, and proprietors of such copies, during the times therein mentioned."—And also to an act, entitled "An Act, supplementary to an Act entitled an Act for the encouragemet of Learning, by securing the copies of Maps, Charts and books to the authors, and proprietors of such copies, during the times therein mentioned and extending the benefits thereof to the arts of designing, engraving, and etching historical and other prints.

WILLIAM KEY BOND, *Clerk of the District of Ohio*

Hist. Sup. 12-17-19

CONTENTS

OF

THE FIRST VOLUME.

ORIGINAL ESSAYS AND CASES.

No. I.

Art. I. History of a case of Neuralgia Facialis. By Daniel Drake, M. D. 13

II. On the Purulent Ophthalmia of Mississippi. By J. H. Savage, M. D. 30

No. II.

Art. I. Yellow Fever of Washington, Miss. By J. W. Monett, M. D. 73

II. Prairies of Ohio. By C. Atwater Esq. . 85

III. Poisoning, by Opium By N. Rowell, M. D. . 92

IV. Extraordinary malpresentation of the Fœtus. By I. Hough, M. D. 95

No. III.

Art. I. Cases of Mercurial Disease. By J. P. Harrison, M. D. 129

II. Dissertation on Remittent Billious Fever. By J. C. Dunlavy, M. D. 141

No. IV.

Art. I. Congenital Chorea Sancti Viti. By Daniel Drake, M. D. 193

II. Epidemic Fevers of Missouri. By James A. M'Pheters, M. D. 198

III. Extractum Juglandis Cinerea. By the same. 210

No. V.

Art. I. Observations on the Modus Operandi and effects of Medicines. By Daniel Drake, M. D. . 249

No. VI.

Art. I. Practical Remarks on Cramp of the Stomach, from Tartar Emetic. By Daniel Drake, M. D. . 297

II. Thoughts on Modern Travelling, designed for Valitudinarians. By the same, . . . 305

No. VII.

Art. I. Observations on Sick Stomach. By Guy W. Wright, M. D. 369

II. Practical Observations on the Typhoid stage of Autumnal Fever. By Daniel Drake, M. D. . 381

No. VIII.

Art. I. Wound of the Internal Jugular Vien, and Ligature of the Carotid Artery. By Henry Miller, M. D. 425

II. Report and Remarks on a case of Cataract, produced by Hooping-Cough. By Guy W. Wright, M. D. 428

III. The extirpation of a Tumour from the Eye. By Dr. Ranson Warner, ... 432

No. IX.

ART. I. Remarks upon the use of Emetics, in the first stage of Malignant, or Congestive Billious Fever; during the months of August, September, October, and November. By Guy W. Wright, M. D. . . 481
II. Observations on the Minor Epidemics of Marietta, in the year 1824. By Dr. Samuel P. Hildreth, . 496
III. An account of the Cynanche Maligna, as it has appeared in Paris, Ky. and its vicinity, at different times since 1821. By Dr. Lloyd Warfield, . 505

No. X.

ART. I. Notes on a case of Cellular Inflammation. By Daniel Drake, M. D. 545
II. An account of the death of a man, from a lacerated wound of the Jejunum, the abdominal parieties remaining entire. By Daniel Drake, M. D. . 550

No. XI.

ART. I. A History of Autumnal Fever of 1822, in Wilson county, Tenn. By Dr. Samuel Hogg, . . 601
II. An Account of the Billious Fever of 1822 in Barren County, Kentucky. By Henry Miller, M. D. 608

No. XII.

ART. I. A remarkable case of Hysteria associated with symptoms of Lyssa By J. W. Monett, . 665
II. Remarks upon Leucorrhœa. By Dr. Lloyd Warfield, 668

SELECTED ESSAYS AND CASES.

No. I.

ART. I. Observations and Experiments on Traumatic Hœmorrhage. By H. G. Jameson, M. D. . . 32

No. II.

ART. I. Vermifuge power of the Cedar Apple. By B. M. Brocchus, M. D. 100
II. Treatment of Archylosis. By J. R. Barton, M. D. 108

No. IV.

ART. I. Staphyloraphe or palate suture. By A. H. Stephens, M. D. 212
II. Pharmaceutic Experiments on Opium. By Robert Hare, M. D. 214

No. V.

ART. I. Observations on the Hirudo Medicinalus. By R. Deitz, ... 264
II. Experiments relative to Venuous Absorption. By Dr. Luzenburg and Mr. Mailliard. . . 268

No. VI.

ART. I. Miscellaneous Observations on Purgative Medicines and on Costiveness. By John Ware, M. D. . 311

No. VIII.

ART. I. Observations on the use of the Sulphuric Acid in the Cure of Intemperance. By W. R. Brinckle, M. D. 435

II. Further Observations on the Case of John Coyle, cured of Anchylosis by a Surgical Operation. By J. Rhea Barton, M. D. 440

No. IX.

ART. I. Notices of some Anomalous Cases of Dropsy. By Dr. N. Chapman, M. D. 514

II. Remarks on the Spontaneous Suppression of Hemorrhage in cases of Divided and Wounded Arteries, with Comments on the Physiology and Pathology of the Circulating System. By Nathan Smith, M. D. 516

No. X.

ART. I. Observations on Piperine. By G. W. Carpenter. 556

No. XI.

ART. I. On the Secale Cornutum or Ergot. By Wm. P. Dewees, M. D. 618

No. XII.

ART. I. On the mechanism of Preternatural Joints. By T. T. Hewson, M. D. . . . 674

ORIGINAL REVIEW.

No. I.

ART. I. Commentaries on the Principles and Practice of Physic. By J. Makittrick, M. D. Elements of Pathology and Therapeutick. By C. H. Parry, M. D. 45

No. III.

ART. I. Observations on the Animal Economy. By J. Gardiner, M. D. 171

II. A Practical Essay on Typhus Fever. By N. Smith, M. D. 174

No. IV.

ART. I. Mattrick's Commentaries and Parry's Pathology, 219

No. V.

ART. I. Traite de Nerfs et de leurs Maladies, par M. Tissot, 273

No. VI.

ART. I. Principles of Dental Surgery. By Leonard Kœcker, M. D. 328

No VII.

ART. I. Principles of Dental Surgery. By Leonard Kœcker, M. D. 406

No. VIII.

ART. I. Diseases of Dutchess County, New-York, from 1809 to 1825. By Dr. Hunting Sherrill, . 458

No. IX.

ART. I. Pathological Anatomy. The last course of Xavier Bichat; from an autographic manuscript of P. A. Beclard; with an account of the life and labors of Bichat. By F. G. Boisseau, Member of the Royal Academy of Medicine of Paris and Madrid, of the Medical Society of Emulation, &c. . 520

No. X.

ART. I. Bichat's Pathological Anatomy, concluded. . 563

No. XI.

ART. I. Observations on the Autumnal Fever of Savannah, By George W. C. Daniel, M. D. . 631

No. XII.

ART. I. An Essay on the Morbid Sensibility of the Stomach and Bowels. By James Johnson, M. D. . 684

SELECTED REVIEW.

No. I.

ART. I. Lectures on the Principles and Practice of Surgery. By Sir Astley Cooper. 52

No. III.

ART. I. Experimental Researches on the Venous Circulation, on Absorption and Poisoned wounds. By D. Barry, M. D. 154

No. IV.

ART. I. Lisfranc on White Swellings, . . . 237

No. V.

ART. I. A case of Melanosis. By Mr. Fawdington. . 278

No. VII.

ART. I. Chlorurets of Lime, and of Sodaas disinfecting agents. By A. G. Labarraque, ... 392

No. VIII.

ART. I. On the Treatment of the more protracted cases of Indigestion. By A. P. W. Philip, M. D. . 443

No. X.

ART. I. A Treatise on the Effects and Properties of Cold. By M. Beaupre, M. D. 579

No. XI.

ART. I. De la Non-Existence du Virus Venerien. Par L. F. R. A. Richond Des Brus. 644

SELECTED INTELLIGENCE.

No. I.

ART. I. Treatment of Wounded Nerves. By Mr. G. Bell. 66
II. Humoral Pathology. By M. Segalas . . 66
III. Experiments on Hydrocyanic Acid. By M. Dupuy. 68
IV. Chloruret of Lime in Burns. . . . 68

No. II.

ART. I. Treatment of Syphilis without Mercury. By F. G. Becker, M. D. 122
II. Treatment of the bite of the Viper. By M. Piorry. 124
III. Absorption of Foreign Matters into the Blood. By G. A. Stethberger. 125

No. III.

Art. I. Important Toxicological Experiments. By Edwards and Dumas. 185
II. Experiments on Pulmonary Exhalation. By Breschet and Edwards. 187
III. Hydrocyanic Acid. 188
IV. Cobalt in Missouri. 188

No. IV.

Art. I. New Method of Detaching the Placenta. By an Italian Physician. 245
II. Tobacco in the Painters' colic. By Dr. Graves. ib
III. Piorry's Pleximetre. 246
IV. Purulent Ophthalmia of Infants. By Dr. Ammon. ib

No. V.

Art. I. Ligature on the Common Iliac Artery. By Professor Mott. 285
II. Encysted Hydrocele. By Mr. Brodie. . . 287
III. Diffused Cellular Inflammation. By Mr. Earle. 289
IV. Communication of the Absorbing and Sanguiferous Vessels. By Dr. Rossi. 291

No. VI.

Art. I. Making Anatomical Preparations in hot climates. By Dr. Davy. 350
II. Erysipelas. By Mr. Arnott, ... 351
III. Excision of Carious Joints. By Mr. Crampton, . 353
IV. Observations on the Diseases of the Nail and Unguel Gland. By Sir Astly Cooper. 360
V. Treatment of Ulcers. By M. Lisfranc. . 361

No. IX.

Art. I. Alcoholic Extract of Nux Vomica in Rheumatic Paralysis, and in the incontinence of Urine in children. 539
II. Camphor in Rheumatism. . . . . ib

No. XI.

Art. I. Tannin in Menorrhagia. 656
II. Cure for Tænia. . . . . ib
III. Strictures of the Rectum. . . . . ib
IV. Nævi Materin. 657
V. Spina Bifida, cured. 658
VI. Cephalic Spinal Fluid. 659
VII. On the Gastric Juice. 660
VIII. Rare Insects. 663
IX. Adulteration of the Sulphate of Quinine with Sugar. ib

No. XII.

Art. I. Cure of Amenorrhœa and Fluor Albus, .
II. Hydrocyanic Acid in Chorea, . .
III. On the Nature and Treatment of Colica Pictonum,
IV. Colica Pictonum treated by Dr. Ranque, .
V. Inflammation of the membrane of the Aqueous humour,
VI. Injurious effects produced in children by protracted Suckling. . . . .
VII. Pulsation in the Veins, ...
VIII. Strictures of the Urethra. . .

ORIGINAL INTELLIGENCE AND NOTICES.

No. I.

ART. I. Absorption of Active Substances into the Circulation. By Drs. Best and Dorsey.—II. Diseases of the Western Country.—III. Convention of Ohio.—IV. Cincinnati Medical Academy.—V. Summer Lectures.—VI. Resignation.—VII. Medical Graduations.—69 to 71.

No. II.

ART. I. Cold water in Poisoning by Opium. By P. B. Wilcox, M. D.—II. Eye Infirmary.—III. Meteoric Stones.—IV. Medical Police.—V. Physical Education.—VI. Western Quarterly Review.—VII. Medical Graduations.—126 to 128.

No. III.

ART. I. Amputation of a part of the Foot. By J. Slavens, M. D.—II. Oil of Turpentine as an external irritant. By J. W. Monett, M. D.—III. Cold Water and Mercury. By the Editors.—IV. Medical Appointments.—190 to 192.

No. IV.

ART. I. Earthquake at Cincinnati.—II. Cloquet's Anatomy.—III. Medical Graduations.—IV. To Correspondents and Subscribers.—247 to 248.

No. V.

ART. I. Iodine in a disease of the heart.—II. Lectures on the Materia Alimentaria.—III. Phrenology.—IV. Ichthyology of North America.—V. Death of President Holley.—VI. Health of Cincinnati.—VII. To Subscribers.—VIII. Medical Lectures in the West.—293 to 296.

No. VI.

ART. I. Ruptures and Trusses.—II. Aurora Borealis.—III. Writers and Correspondents.—366.

No. VII.

ART. I. Taking up the Carotid Artery.—II. Amputation of Thigh with a single flap.—423 to 424.

No. VIII.

ART. I. Syphilis irritated, and continued, by Constitutional Derangement, irrelevant to the local disease.—II. Cæsarian Operation.—III. Endemic Sick Stomach.—IV. Injury resulting from the retention of some of the bones of the fœtal cranium.—V. Union of Opium with Cathartics, in Dysentery.—VI. Cincinnati Eye Infirmary.—VII. Tincture of Iodine in Scrofulous ophthalmia.—476 to 480.

No. IX.

ART. I. Fatal Case of Dyspepsia. By Dr. Elisha Coons.—544.

No. X.

ART. I. Hepatica Triloba or Liverwort.—II. Fœtal Monstrosity.—III. Medical Convention of Ohio.—IV. Cincinnati Eye Infirmary.—V. Epidemic Quackery.—VI. Obituary Notice.—595 to 600.

No. XI.

ART. I. Laryngotomy.—II. Public Lectures.—564.

No. XII.

ART. I. Lectures on Phrenology.—II. Cincinnati Medical Academy.—III. Graduates of the Medical College of Ohio.—IV. Graduates of Transylvania University.—718 to 720.

TO

SUBSCRIBERS,

READERS, AND CORRESPONDENTS.

1. As one of the editors will be absent for several weeks, the second number will not appear 'till the end of the month of May.

2. We hope that the professional friends who are disposed to lend us their assistance as contributors, will consider how very acceptable that assistance will be, in the infancy of our undertaking, when our correspondents are but few. Papers for the next number will be in time, if received by the middle of May.

3. We trust that our senior brethren of the East will not regard a journal in the Backwoods, as altogether unworthy of the productions of their more experienced pens. The number and intelligence of their Western readers would be greater than many of them would suppose; and we shall feel proud to be instrumental in making them more extensively and advantageously known throughout a new region.

4. The authors and publishers of books in the Atlantic states, who may wish to have their works analyzed in this journal, will find no difficulty in transmitting them to us, through

any of the respectable booksellers of New-York, Philadelphia, or Baltimore. They should be directed to Messrs. N. & G. GUILFORD, Booksellers, Cincinnati, Ohio.

5. The proprietors of this journal will be happy to exchange it for other works of a similar kind, in the various parts of North America.

Cincinnati, March 31*st*, 1827.

PROSPECTUS

OF THE

WESTERN

Medical and Physical Journal,

ORIGINAL AND ECLECTIC.

EDITED BY

DANIEL DRAKE, M. D.

Late Professor of the Theory and Practice of Medicine in Transylvania University,

AND

GUY W. WRIGHT, M. D.

IN the Eastern States, there are several highly respectable MEDICAL JOURNALS, while the Western have not one. It is the design of the Editors to supply this *desideratum.* How far they may succeed, is not for them to predict, as their fitness to conduct such a publication, and to what degree it will be sustained by the writers and readers of the West, can only be known by experiment. That time will be necessary to bring it into public favour, they are fully sensible: they commence it, therefore, in a spirit of perseverance, and without the cheering hope of early or brilliant success.

Its plan embraces both original and selected matter. For the former, they must rely chiefly upon the numerous intelligent Physicians and Surgeons, who are scattered over the States of the Mississippi; between whom the JOURNAL may promote much useful communication—while it serves the whole as a channel, through which their discoveries may

reach our elder brethren of the East. To effectuate these interesting objects, it is only necessary, that those who have original matter to communicate, should consent to publish it in the interior, where they live and to which it relates, instead of sending it to the periodical presses of the sea board. A concentrated effort must speedily raise a WESTERN JOURNAL to the distinction claimed for works of a similar kind, in other and older portions of the United States.

The eclectic department will contain such essays, reviews and digests of intelligence from other Journals, and the various new publications of the day, both in America and Europe, as will apprise the reader of all important discoveries and improvements that may be made; for which purpose a *monthly* will be found preferable to a *quarterly* publication, as giving earlier information.

The natural history of the Mississippi States is a subject of interest, both in a professional and a national point of view; and as there is not in this region, any MAGAZINE devoted to the Physical Sciences, the Editors will be gratified to receive, and (when matters strictly professional are not on hand) make public, all kinds of original facts and observations on the Climate, Mineralogy, Botany and Zoology of the States, which lie between the Lakes and the Gulph of Mexico.

The Editors will only add, that they shall be happy to make their JOURNAL a vehicle of publication for the original experiments and useful improvements which may, from time to time be made, either by professors or graduates, in the Medical schools of the West. They will also, with pleasure, if requested, insert annual notices of Lectures, both in these institutions and those of the whole United States.
